Paul, can you please remind me where the water is being stored and what quantity to date has been collected. Based on 4<sup>th</sup> Quarter groundwater data, we need to stress the importance of doing a full suite of constituents rather than the limited or process knowledge theory. It is critical to fully understand the current groundwater chemistry to adequately develop and deploy a treatment process. If samples were collected and analyzed, we would like to see the data.

Kevin, if this is not being done. The Tribes would like to request this be done for all future sites to ensure no additional contamination is placed on the surface of this facility.

Thanks

Kelly

Kelly,

Today the step-down test was completed for EW-03, and all parameters were within spec. Tomorrow, the step-down test will be performed for EW-02. If you have any questions, please give me a call.

Best,  
Paul DesFosses
